

LASER FOCUS/ ELECTRO-OPTICS INDEX: Jan. 1985-Dec. 1985*

CATEGORIES

COMPANIES AND MARKETS

- Electro-Optics
- Fiberoptics
- General
- Laser

CONFERENCES

ELECTRO-OPTICS

- Detectors and sensors
- Imaging and display
- Radiometry and photometry
- Systems

FIBEROPTICS AND LIGHTWAVE

COMMUNICATIONS

- Components
- Instrumentation
- Research
- Systems

INSTITUTIONS AND FACILITIES

LASER APPLICATIONS

- Biomedical
- Chemistry and spectroscopy
- Fusion
- Material processing
- Military
- Optical data storage
- Reprographics and printing

LASERS

- Components, instrumentation, and materials
- Design and operation
- Research

OPTICS

- Components and materials
- Design and fabrication
- Research

COMPANIES AND MARKETS

Electro-Optics

Outlook for military E-O: Defense cuts unlikely to halt growth, Ron Tillen, Feb., p. 12.
Current issues facing the electro-optics industry, Philip Speser, Mar., p. 14.
Machine vision comes of age at Vision '85, June, p. 63.
The U.S. optical components market, Judd Holt, Nov., p. 108.
CD-ROM and write-once optical storage—right now, Edward S. Rothchild, Dec., p. 14.
Current developments in commercial detector technology, Judd Holt, Dec., p. 82.

Fiberoptics

Fiber optic systems in autos expected to pick up, Jan., p. 52.
Galileo Electro-Optics announces commercially available IR fibers, Mar., p. 10.

Nontelecommunications uses to spur fiber growth, Apr., p. 58.
Bellsouth, Siecor form new corporation, May, p. 78.
Measuring the growth of the fiber optics industry, John N. Kessler, Oct., p. 14.
Pacific basin fiber optics markets growing 26% annually, study states, Nov., p. 70.

General

The prognosis for 1985: Technical advances and policy issues, Morris R. Levitt, Jan., p. 10.
Science and technology policy: The next two years, Philip Speser, Jan., p. 16.
DOD exercises new "export control" policy at recent SPIE symposium, May, p. 8.
An interview with Congressman Ed Zschau of the high tech task force, Philip Speser, May, p. 16.
National security and control of dissemination of information at society meetings, Philip Speser, June, p. 16.
Congressman Lundine on science, technology, and industrial competitiveness policies, Philip Speser, July, p. 18.
Interfaces mean business at Xerox PARC, Gary Forrest, Sept., p. 44.
A trade war with Japan is moving on to the legislative agenda, Philip Speser, Oct., p. 18.
French optics industry is poised for the future, Roland Roux, Nov., p. 142.
Cloudy outlook for FDA regulatory reform in congress, Philip Speser, Dec., p. 18.

Laser

1985 Laser economic review & outlook, B. Akerley, Jan., p. 75.
Advances in commercial lasers 1984-85, Jan., p. 84.
Japanese laser market booming, Jan., p. 134.
CO₂ lasers give cutting edge to Japanese industry, David A. Belforte, Feb., p. 20.
Cooper forms ophthalmic division, Feb., p. 106.
Company formed to market laser system, Feb., p. 108.
The medical laser field in transition: Gains seen in acceptance and profits, David Schwartz, Mar., p. 12.
Biostimulation smooths the wrinkles from marketers' brows, Dr. Silvio Gualini, Mar., p. 40.
Outlook for medical laser market strong as sales surge, Barbara Akerley, Mar., p. 62.
Spectra-Physics pegs laser systems market at \$4.1 billion, Mar., p. 104.
Metamorphosis of the industrial laser business, John S. Eckersley, Apr., p. 12.
Politics of praise and politics of support for medical laser research, Philip Speser, Apr., p. 14.

*This index includes all contributed articles and major news stories published from January to December 1985. The items are arranged by category and in order by month of issue.—Ed.

CD-ROM and write-once optical storage—right now, Edward S. Rothchild, Dec., p. 14.
Current developments in commercial detector technology, Judd Holt, Dec., p. 82.

Fiberoptics

Fiber optic systems in autos expected to pick up, Jan., p. 52.
Galileo Electro-Optics announces commercially available IR fibers, Mar., p. 10.

Nontelecommunications uses to spur fiber growth, Apr., p. 58.
Bellsouth, Siecor form new corporation, May, p. 78.
Measuring the growth of the fiberoptics industry, John N. Kessler, Oct., p. 14.
Pacific basin fiberoptics markets growing 26% annually, study states, Nov., p. 70.

General

The prognosis for 1985: Technical advances and policy issues, Morris R. Levitt, Jan., p. 10.
Science and technology policy: The next two years, Philip Speser, Jan., p. 16.
DOD exercises new "export control" policy at recent SPIE symposium, May, p. 8.
An interview with Congressman Ed Zschau of the high tech task force, Philip Speser, May, p. 16.
National security and control of dissemination of information at society meetings, Philip Speser, June, p. 16.
Congressman Lundine on science, technology, and industrial competitiveness policies, Philip Speser, July, p. 18.
Interfaces mean business at Xerox PARC, Gary Forrest, Sept., p. 44.
A trade war with Japan is moving on to the legislative agenda, Philip Speser, Oct., p. 18.
French optics industry is poised for the future, Roland Roux, Nov., p. 142.
Cloudy outlook for FDA regulatory reform in congress, Philip Speser, Dec., p. 18.

Laser

1985 Laser economic review & outlook, B. Akerley, Jan., p. 75.
Advances in commercial lasers 1984-85, Jan., p. 84.
Japanese laser market booming, Jan., p. 134.
CO₂ lasers give cutting edge to Japanese industry, David A. Belforte, Feb., p. 20.
Cooper forms ophthalmic division, Feb., p. 106.
Company formed to market laser system, Feb., p. 108.
The medical laser field in transition: Gains seen in acceptance and profits, David Schwartz, Mar., p. 12.
Biostimulation smooths the wrinkles from marketers' brows, Dr. Silvio Gualini, Mar., p. 40.
Outlook for medical laser market strong as sales surge, Barbara Akerley, Mar., p. 62.
Spectra-Physics pegs laser systems market at \$4.1 billion, Mar., p. 104.
Metamorphosis of the industrial laser business, John S. Eckersley, Apr., p. 12.
Politics of praise and politics of support for medical laser research, Philip Speser, Apr., p. 14.

*This index includes all contributed articles and major news stories published from January to December 1985. The items are arranged by category and in order by month of issue.—Ed.

LF/E-O INDEX

Commercial lasers—The next 5 years, L. Holmes, May, p. 146.
First shipments of compact CO₂ lasers scheduled, June, p. 62.
Sharp multiplies diode-laser production, L. Holmes, Aug., p. 22.
Low-power argon laser design targets OEM applications, Benjamin H. Cook, Jr., Aug., p. 100.
Laser unit sales expand 54% in nonimpact printing, Barbara H. Akerley, Aug., p. 106.
Streamlining FDA regulations governing lasers, Philip Speser and Patricia Anderson, Nov., p. 18.
Lasers in the factory: Market becoming user oriented, Barbara H. Akerley, Nov., p. 150.

CONFERENCES

Newport conference covers fiber optics industry, Jan., p. 8.
Engineering issues in integrated optics, Jan., p. 42.
Pittsburgh conference on analytical chemistry and spectroscopy, Feb., p. 22.
Thermosense conference broadens its scope, Feb., p. 54.
OFC program combined with OFS, Feb., p. 66.
Ophthalmic treatments exploit novel laser/tissue interactions, Lewis Holmes, Mar., p. 20.
Review of CLEO, Apr., p. 16.
SPIE's symposium bridges optics to millimeter and microwave applications, Apr., p. 36.
Electro-optics/laser International Japan draws crowds, Dr. Gary T. Forrest, Apr., p. 58.
Fiber capacity displayed, Richard Mack, Apr., p. 100.
CLEO '85: Celebrating the laser's twenty-fifth birthday, David H. Auston and Ralph R. Jacobs, May, p. 14.
To learn about new lasers, come to CLEO!, May, p. 32.
Meeting addresses challenges in integrating laser and robotic technology, June, p. 8.
Material processing, medicine share spotlight at Munich laser O-E congress, June, p. 22.
Machine vision comes of age at Vision '85, June, p. 63.
Materials processing in spotlight at U.K. lasers in manufacturing conference, Brian Dance, July, p. 40.
Imaging topics at SPIE symposium highlighted, July, p. 46.
Fiber optics '85 in London, July, p. 54.
Japanese physics conference shows lasers, July, p. 68.
SPIE symposium scheduled for Aug. 18-23, A. Tebo, Aug., p. 38.
FOC/LAN preview, Sept., p. 72.
Federal high tech conference, Sept., p. 78.
Planned Shanghai trade show indicates promise of Chinese market for lasers and fiber optics, Oct., p. 8.
ICALEO '85 will offer five technical applications symposia, Oct., p. 36.
British meeting focuses on coherent laser radar systems, Brian Dance, Oct., p. 46.
Electronic imaging '85 conference, Oct., p. 50.
Spread the word—ICALEO '85, C.E. Albright, Nov., p. 14.
SDI in spotlight at Lasers '85 conference, Nov., p. 22.
MRS fall meeting to focus on materials for SDI, Nov., p. 28.
IEDM focuses on advances in device technology, Nov., p. 46.
U.K. quantum electronics conference, B. Dance, Dec., p. 22.
Major product introductions at Japan exhibit, Dec., p. 44.

ELECTRO-OPTICS

Detectors and sensors

Imaging sensors evaluated with simulated tactical environments, June, p. 41.
Sensors and cameras for machine vision, F. Sachs, July, p. 82.
1985 trends in detector technology, Judd Holt, Dec. p. 76.

Imaging and display

Military electro-optics: U.S. army supports electrolumines-

cence for flat-panel displays, Albert R. Tebo, Mar., p. 46.
Understanding how images are digitized, June, p. 44.
Imaging science—a discipline emerges, B. Bulkin, July, p. 14.
Laser addresses LCDs, July, p. 46.
Imaging topics at SPIE symposium highlighted, July, p. 46.
Liquid crystal shutter technology produces stereoscopic images, Oct., p. 52.
New trends in solid-state electronic imaging detectors, Irv Hirschberg, Dec., p. 92.

Radiometry and photometry

Critical effects in radiation thermometry, Feb., p. 54.
GaAsP schottky diodes beat silicon for UV, Feb., p. 56.
New developments, products in radiometric instrumentation, Albert Tebo, Sept., p. 50.

Systems

Bragg cell combines wavelength switch with frequency shifter, Jan., p. 46.
Machine vision: Solving automation problems, Judy Cobb, Mar., p. 74.
Simple through-air IR transmitter and receiver, Wunnavu V. Subbarao, Mar., p. 100.
Integrated optical waveguide work in England, Apr., p. 44.
IRAS—The IR astronomical satellite, A. Tebo, Apr., p. 106.
Advanced CID array multispectral pushbroom scanner, S.E. Stewart, R.R. Buntzen, and Joseph Carbone, June, p. 88.
British ring laser gyroscope, Brian Dance, June, p. 130.
Air Force begins testing of laser sensor/tracker, July, p. 48.
Major space programs contribute to E-O advances, Helen Plasse, Aug., p. 112.
Electro-optic technology in machine vision, Aaron Gara, Oct., p. 148.

FIBEROPTICS AND LIGHTWAVE COMMUNICATIONS

Components

Long-wavelength components by vapor phase epitaxy, Gregory H. Olsen, Jan., p. 124.
The effect of LEDs on fiber optic bandwidth, Ronald L. Ohlhaber and Ted R. Uliasz, Feb., p. 98.
Galileo Electro-Optics announces commercially available IR fibers, Mar., p. 10.
Fewer steps required to fabricate HRO DFB laser for single frequency (1.55 μ m) fiber optics, Mar., p. 54.
Advanced fiber designs, Craig M. Lemrow and Venkata A. Bhagavatula, Mar., p. 82.
TRW's progress in long-wavelength devices, Apr., p. 46.
Fiber optic submarine two-way repeater tested, Apr., p. 50.
Fiber capacity displayed, Richard Mack, Apr., p. 100.
Single-mode directional couplers, V.J. Tekippe and W.R. Willson, May, p. 132.
Advance in fiber optic packaging concepts, June, p. 48.
Low coherence laser for analog systems use, C.F. Clarke, M.C. Hales, J. Walters, H.H. Nathan and A. Laughton, June, p. 102.
Fiber optic cable assemblies: Deciding to make or buy, Lou Maiolo and Ray Coulombe, Aug., p. 90.
Advances in sensors for hostile environments, Brian Dance, Oct., p. 68.
Components show increasing sophistication with trend to single-mode transmission, Eugene I. Gordon, Oct., p. 128.
LF/E-O technology symposium: Mid-IR fiber R&D makes progress in several directions, Dec., p. 98.

Instrumentation

Looking at fiber optic power meters, R. Mack, July, p. 90.

LF/E-O INDEX

Digital lock-in techniques for IR detector and fiberoptic testing, J. L. Scott, J. S. Pease, and E. H. Fisher, Sept., p. 122.
Measurement trends in fiber telecommunications, John Chipman, Oct., p. 134.
Fiberoptic vs. ring laser gyro: An assessment of the technology, Eric Udd, Dec., p. 64.

Research

Optical sensors research unit formed, May, p. 72.
New fluoride glass developed by Corning, Sept., p. 10.
Researchers develop quantum well optical switch, Oct., p. 50.
Single-crystal fiber applications include nonlinear optical effects, M. Fejer, J. Nightingale, G. Magel and R. Byer, Oct., p. 60.
Research advances in fiberoptic interferometric and polarimetric sensors, J.D.C. Jones and D.A. Jackson, Oct., p. 142.
NTT's program emphasizes silica-based optical integrated circuits, Dec., p. 50.
Single-mode 1.55- μ m lasers use volume holographic grating, Dec., p. 56.

Systems

Fiberoptic systems in autos expected to pick up, Jan., p. 52.
Fiberoptics provide secure monetary transactions, Jan., p. 54.
Fluor's plan for a fibered Gulf of Mexico, C. David Chaffee, May, p. 64.
Fiberoptics' advantages in data communications outlined, May, p. 66.
Fiberoptic beam delivery enables YAG system to serve five workstations, June, p. 8.
SaakTel completes fiberoptic network, June, p. 52.
Pirelli introduces analog transmission system, July, p. 60.
FCC grants two licenses for cable landing rights, C. David Chaffee, Aug., p. 52.
Single-mode technology enters cable TV area, Sept., p. 64.
AT&T readies its first undersea optical cable transmission test, Nov., p. 52.
Consolidation marks U.S. longhaul fiber efforts, C. David Chaffee, Nov., p. 58.
Coherent fiberoptic communications, D. W. Smith, Nov., p. 92.

INSTITUTIONS AND FACILITIES

Cooperative ventures for research in optical circuitry and manufacturing, Jan., p. 48.
NSF's quantum electronics, waves, and beams program, Philip Speser, Feb., p. 14.
How industry helped build Nova, the world's largest high-precision optical project, Robert Godwin, Apr., p. 78.
Trade association chartered to serve laser industry, July, p. 8.
SPIE's traditional focus to expand in future years, Lewis Larmore, Aug., p. 14.
4th-harmonic experiments at "Greco" in France, Roland Roux, Aug., p. 30.
Streifer to head university center, Aug., p. 60.
Laser technician program at Pasadena City College, Lynette Gutierrez, Sept., p. 78.
Battelle survey on industrial laser R&D, S. Ream, Oct., p. 22.
Rutgers opens materials research center, Oct., p. 66.
University of LaVerne's optical dept., Oct., p. 76.
Regional centers support laser-based research, Lewis Holmes, Nov., p. 78.

LASER APPLICATIONS AND LASER-BASED R&D

Biomedical

The medical laser field in transition: Gains seen in acceptance and profits, David Schwartz, Mar., p. 12.
Ophthalmic treatments exploit novel laser/tissue interactions,

Lewis Holmes, Mar., p. 20.
800 U.S. neurosurgeons use lasers, Mar., p. 36.
Biostimulation smooths the wrinkles from marketers' brows, Dr. Silvio Gualini, Mar., p. 40.
Outlook for medical laser market strong as sales surge, Barbara Akerley, Mar., p. 62.
Politics of praise and politics of support for medical laser research, Philip Speser, Apr., p. 14.
Lasers in biology, R.M. Hochstrasser and C.K. Johnson, May, p. 100.
Lasers used for dentistry in France, June, p. 26.
New equipment expands laser-surgery potential, July, p. 12.
Excimer lasers offer promise in surgical applications, David Muller and Richard Svrluga, July, p. 70.
The medical laser approval process, D. Schwartz, Aug., p. 18.
Lasers in ophthalmology: An update, Carmen A. Puliafito and Roger F. Steinert, Sept., p. 84.
Argon-laser fiber catheter clears arteries, Oct., p. 10.
CO₂ lasers open channels to the heart, Oct., p. 24.
Laser cancer treatment may also help on other diseases, Carlo Perria, Oct., p. 44.
Medical lasers are not just a surgical tool, Leon Goldman, Nov., p. 14.
Streamlining FDA regulations governing lasers, Philip Speser and Patricia Anderson, Nov., p. 18.
New medical laser line developed, Nov., p. 72.

Chemistry and spectroscopy

Recent trends in laser remote sensing, Jan., p. 24.
Recent developments in laser spectroscopy, Dianna G. Jones, Donald O. Landon, and Robert Compton, Feb., p. 22.
Laser fluorescence illuminates biochemical details, Dr. Katherine Korkidis, Feb., p. 22.
Laser-based polarimetry enhances biochemical detection, Edward S. Yeung, Feb., p. 30.
Frequency-dependent spectroscopy measures time-dependent phenomena, Joseph R. Lakowicz, May, p. 156.
Molecular studies with tunable diode lasers, J.A. O'Neill and G.W. Flynn, June, p. 136.
Lasers make cold atomic gases, Dec., p. 32.

Fusion

Vulcan drives fusion targets to record densities, Jan., p. 6.
How industry helped build Nova, the world's largest high-precision optical project, Robert Godwin, Apr., p. 78.
Omega sets neutron record in laser fusion, June, p. 10.
KDP frequency doubling crystals get larger, June, p. 34.
Long-fiber pulse-compression scheme could aid laser fusion, Sept., p. 10.
Inertial fusion at a critical juncture, R. McCrory, Sept., p. 14.
Technical progress in the U.S. inertial fusion program, David Bixler, Sept., p. 140.
Platinum particles cripple Livermore fusion laser, Dec., p. 8.

Material processing

CO₂ lasers give cutting edge to Japanese industry, David A. Belforte, Feb., p. 20.
Programmable A-O deflection speeds marking, July, p. 22.
Real-time rule-based decision system controls laser cutter, July, p. 34.
Materials processing in spotlight at U.K. lasers in manufacturing conference, Brian Dance, July, p. 40.
Computerized CO₂ systems cut saw blades, Aug., p. 34.
Battelle survey on industrial R&D, S. L. Ream, Oct., p. 22.
Excimer lasers process semiconductors, Nov., p. 22.

Military

Range-finder developed, May, p. 76.
Pros and cons of defense R&D business, P. Speser, Sept., p. 18.
Use of bomb-pumped lasers "unlikely" in strategic defense, July, p. 28.

LF/E-O INDEX

Recent SDI laser tests completed successfully, Nov., p. 8.

Optical data storage

1985 to be year of erasable disk, E. Rothchild, May, p. 52.
Design of optical storage products, L. Laub, June, p. 74.
Optical storage products: Part two, L. Laub, Sept., p. 104.
CD-ROM and write-once optical storage—right now, Edward S. Rothchild, Dec., p. 14.

Reprographics and printing

Laser scanning and recording: Developments and trends, Leo Beiser, Feb., p. 88.
Diodes replace He-Ne's in IBM printer, June, p. 26.
British firm develops holographic copier, Aug., p. 46.
Laser unit sales expand 54% in nonimpact printing, Barbara H. Akerley, Aug., p. 106.
Scanning subsystems: First and final choices, Ed Grenda, Oct. p. 149.
Scan lens zooms medical images in laser recorder, Nov., p. 42.

LASERS

Components, instrumentation, and materials

Gas laser users face issues of gas purity and safety, Helen Plasse, Mar., p. 94.
Laser rod supplies are crucial link in system performance, Helen Plasse, June, p. 124.
Video graphics system analyzes laser beam profiles, F. Martin and J.G. Williams, July, p. 104.
Sharp multiplies diode-laser production, L. Holmes, Aug., p. 22.
Cobalt perovskite lases in the near IR, Aug., p. 8.
Pulsed semiconductor lasers find use in high-speed photography, Lee A. Cross, Aug., p. 76.
Diode-laser research extends single-mode output power, Dan Botez, Sept., p. 28.
Nd: glass zig-zag slab emits 40-J laser pulses, Oct., p. 32.
KTP as a harmonic generator for Nd:YAG lasers, Roger Belt, Gleb Gashurov, and Yung S. Liu, Oct., p. 110.
Fiber optic vs. ring laser gyros: An assessment of the technology, Eric Udd, Dec., p. 64.

Design and operation

Designing ultrafast semiconductor lasers, K.Y. Lau, Jan., p. 56.
Laboratory dye laser features simplicity of design, Mar., p. 32.
Fewer steps required to fabricate HRO DFB laser for single frequency (1.55 μm) fiber optics, Mar., p. 54.
Developments to watch in diode lasers, Michael Ettenberg, May, p. 86.
Development of a new 20-kW CO₂ laser, V.E. Merchant, May, p. 162.
Power fluctuations in He-Ne lasers, A.D. White, Aug., p. 64.
Low-power argon laser design targets OEM applications, Benjamin H. Cook, Jr., Aug. p. 100.
Vacuum instruments for measuring and controlling laser gases, Basil Power, Nov., p. 86.
Cost considerations for industrial excimer lasers, Gary Klau-minzer, Dec., p. 108.

Research

Plasmas lase at soft x-ray wavelengths, Jan., p. 22.
Nova laser fires ten beams, Feb., p. 8.
NSF's quantum electronics, waves, and beams program, Philip Speser, Feb., p. 14.
Lasers in space, E. David Hinkley, James R. Lesh, and Robert T. Menzies, Feb., p. 78.
Tunable high-rep-rate pulses get shorter, Mar., p. 10.
Femtosecond schemes make continuum pulses at kHz repetition rates, Mar. p. 22.
X-ray interference effects found in "Transition Radiation," Mar., p. 24.

IR FEL tunes over 26 μm , Apr., p. 8.

LF/E-O technology symposium: Frontiers of femtosecond research, Lewis Holmes, Apr., p. 64.

Pulse duration exceeds 1 μs in XeCl discharge laser, May, p. 10.
Blue laser could open door to submarine communications, May, p. 22.

Nd:glass laser octal generates 3rd-harmonic pulses, Roland Roux, June, p. 22.

Solid-state-laser R&D draws a bead on tunability, efficiency, and high average power, Lewis Holmes, June, p. 112.

Real-time rule-based decision system controls laser cutter, July, p. 34.

Picosecond optical and electronic disciplines interact, Gerald A. Mourou, Aug., p. 26.

Chaos is power, Sept., p. 22.

Diode-laser research extends single-mode output power, Dan Botez, Sept., p. 28.

CO₂ lasers open channels to the heart, Oct., p. 24.

LF/E-O technology symposium: Optical bistability: What's ahead, Lewis Holmes, Oct., p. 84.

SDI in spotlight at Lasers '85 conference, Nov., p. 22.

U.K. quantum electronics conference, B. Dance, Dec., p. 22.

OPTICS

Components and materials

Trends in ultraviolet optics, M. Case and R. Merk, Feb., p. 20.
Measuring the critical properties of infrared optical materials, Paul Kuttner, Apr., p. 90.
Nondestructive technique pinpoints optical coating defects, May, p. 28.
Measuring the critical properties of infrared optical materials: Part two, Paul Kuttner, May, p. 120.
New materials & design components for integrated optics, Mir Akbar Ali, Aug., p. 48.
The U.S. optical components market, Judd Holt, Nov., p. 108.
Selecting linear slides: From ball-bearings to PZTs, William Vaughan, Dec. p. 112.
Lithium niobate applications in optics and acousto-optics, Larry Castelli, Dec., p. 120.

Design and fabrication

KCl optics handles 20-kW industrial CO₂ laser, Jan., p. 28.
Advances in optical production processes, Ray Boulay, Jan., p. 118.
Software evaluates, optimizes optical systems, Feb., p. 60.
Fiber-reinforced plastics form low-mass mirrors for space, W. Ernst, Apr., p. 40.
Optical surface characterization and testing, James Zavislan, Sept., p. 56.
Lens design challenges in optical communications, W. J. Tomlinson, Sept., p. 62.
The scratch standard is only a cosmetic standard, Matt Young, Nov., p. 138.

Research

SPIE's symposium bridges optics to millimeter and microwave applications, Apr., p. 36.
Optics researchers test new ground in computing, H.J. Caulfield, June, p. 34.
Accurate digital spectrometry measures index of refraction, June, p. 36.
Submicrometer optical waveguide structures fabricated by reactive ion etching, July, p. 50.
Nine companies show interest in joint optoelectronic R&D effort, Aug., p. 12.
Recent advances in interferometric optical testing, James Wyant and Katherine Creath, Nov., p. 118.
